Governance

Validity, reliability and utility of the Irish Nursing Minimum Data Set for General Nursing in investigating the effectiveness of nursing interventions in a general nursing setting: a repeated measures design

Development and validation of a measure of health literacy in the UK: the newest vital sign

Nottingham Prognostic Index Plus (NPI+): a modern clinical decision making tool in breast cancer
(A team of UK researchers have updated the widely-used Nottingham Prognostic Index to include additional biomarkers, based on the latest evidence; when available for use in practice, this will help improve prognosis and treatment decisions)

Tearing up all that has gone before

Should assisted dying be lawful?

Childhood obesity: the challenges for nurses

Suicide figures come down but better care is needed, say charities
*Mental Health Practice*, 2014, vol. 17, no. 6, p. 6

Re-examining the basis for ethical dementia care practice

Capturing district nursing through a knowledge-based electronic caseload analysis tool (eCAT)
Leadership

There can be no excellence in practice without senior nurses
(Practice comment)

Clinical supervision. From staff nurse to nurse consultant. Part 11: Evaluation

The role and development of consultancy in nursing practice

Leadership development in the English National Health Service: a counter narrative to inform policy

Workforce

Better MS services
(Article on Specialist MS nurses in Northern Ireland)

“Think of a world without any... diabetes specialist nurses”

Attitudes towards caring for older people in Scotland, Sweden and the United States

Learn how to win in the game of life
Nursing Times, 2014, vol. 110, no. 10, p. 33

A question of death
(Examines, in light of fresh debate on assisted dying laws, issues facing nurses)

When tasks overwhelm, the human touch will be missing
Carr, J.D. Nursing Times, 2014, vol. 110, no. 9, p. 11
