Preventing psychological distress in patients with acne  

A systematic review of interactive multimedia interventions to promote children's communication with health professionals: implications for communicating with overweight children  

Development and psychometric testing of the online Adolescent Diabetes Needs Assessment Tool (ADNAT)  

Factors with the management of incontinence and promotion of continence in older people in care homes  
Patient Experience

Why don't patients adhere to compression therapy?

The experiences of palliative care health service provision for people with non-malignant respiratory disease and their caregivers: an all-Ireland study

Meeting the psychological care needs of patients with cancer

Reflections from the front line: Advance Care Planning research
Exclusively written for ehospice, this article by Sarah Russell, Director of Education and Research, Hospice of St Francis, explores how best to ‘build the realistic bridge between theory, evidence, education and practice’ in Advance Care Planning; in caring for people living with dying, hospice staff face challenges of producing processes that not only work but are, above all, patient-centred
